

# RT510TX

Boiler Plus Compliant Thermostat

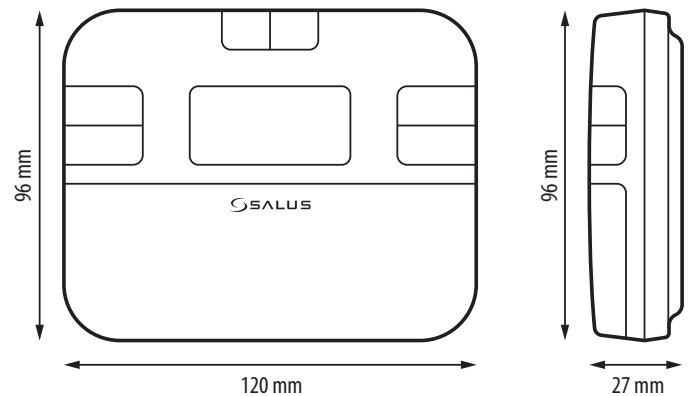

The RT510TX is a stylish, simple to install and use wireless RF fully programmable room thermostat that can be paired with a range of compatible receivers. With built in ITLC (Internal Temperature Load Compensation) it is fully compliant with Boiler Plus.

### Characteristics

- ITLC (Internal Temperature Load Compensation)
- Boiler Plus Compatible
- Sleep Mode
- Programmable time and temperature scheduling
- Frost Protection
- Desk Stand
- 5 Year Warranty
- Simple Operation
- Frequency 868 MHz with 30 metre range
- Manual mode on thermostat to disable schedule
- Heating Boost Mode
- Holiday Mode
- Manual override
- Contemporary design
- RF Test Function
- Easy Installation

## Features

Product	Boiler Plus Compliant Thermostat
Communication	Wired
Temperature scale	5 - 35°C
Temperature accuracy	0.1°C or 0.5°C
Output	NO/COM/NC
Control algorithm	TPI or Hysteresis $\pm 0.25^\circ\text{C}$
Max. load	3 (1) A
Dimensions (mm)	120 x 96 x 27

## Connection scheme
