RT520 THERMOSTAT - FULL USER MANUAL

SALUS
CONTROLS

TABLE OF CONTENTS

1. Introduction

1.1 Product Compliance

This product complies with the essential requirements and other relevant provisions of Directives 2014/53/EU and 2011/65/EU. The full text of the EU Declaration of Conformity is available at the following internet address: www.saluslegal.com.

1.2 Safety Informations

• Before starting installation work and before using the product, read the entire manual.
• The information contained in the instructions is essential for proper functioning.
• To avoid accidents resulting in personal injury and material damage, please follow all safety precautions, specified in this manual.
• The device should not be used by people with limited mental, sensory or mental abilities, without experience, of insufficient knowledge as well as children.
• Do not use an unassembled device (eg without a cover).
• The device may only be opened by a qualified person.
• Keep electrical devices out of the reach of children and ensure that they do not play with it. Children should not be left unattended. If necessary, disconnect the control system for the entire room.
• Do not leave the packaging, cabinet, or any loose parts of the device unattended, as they pose a risk to children.

WARNING!
• Installation must be carried out by a qualified person with appropriate electrical qualifications in accordance with standards and regulations in force in the given country and in the EU.
• Never try to connect the device other than as described in the manual.
• Before assembly, repair or maintenance as well as during any connection works it is absolutely necessary disconnect the mains supply and make sure that the terminals and electric wires are not live.
• The device may not be exposed to extreme temperatures, strong vibrations or subjected to mechanical shock.
• The device should not be used in unfavorable environmental conditions or in rooms where there is a concentration of flammable gases, fumes or dust.

WARNING!
• There may be additional protection requirements for the entire installation that the installer is responsible for maintaining.

Care for the natural environment is of paramount importance to us. The awareness that we manufacture electronic devices obliges us to dispose of used electronic components and devices safely. Therefore the company has received a registration number issued by the Chief Inspector for Environmental Protection. The crossed out symbol the trash can on the product means that the product must not be disposed of with ordinary waste containers. Sorting waste for recycling helps to protect the environment. It is the user's responsibility to surrender used equipment to a designated collection point for recycling waste from electrical and electronic equipment.

2. Product Overview

The RT520 room thermostat simply switches the heating system on and off as necessary. It works by sensing the air temperature, switching on the heating when the air temperature falls below the thermostat setting, and switching it off once this set temperature has been reached.

Turning a room thermostat to a higher setting will not make the room heat up any faster. How quickly the room heats up depends on the design of the heating system, for example, the size of boiler and radiators. Neither does the setting affect how quickly the room cools down. Turning a room thermostat to a lower setting will result in the room being controlled at a lower temperature, and saves energy.

The heating system will not work if a time switch or programmer has switched it off.

The way to set and use your room thermostat is to find the lowest temperature setting that you are comfortable with, and then leave it alone to do its job. The best way to do this is to set the room thermostat to a low temperature – say 18°C – and then turn it up by one degree each day until you are comfortable with the temperature.

You won't have to adjust the thermostat further. Any adjustment above this setting will waste energy and cost you more money.

If your heating system is a boiler with radiators, there will usually be only one room thermostat to control the whole house. But you can have different temperatures in individual rooms by installing thermostatic radiator valves (TRVs) on individual radiators. If you don't have TRVs, you should choose a temperature that is reasonable for the whole house. If you do have TRVs, you can choose a slightly higher setting to make sure that even the coldest room is comfortable, then prevent any overheating in other rooms by adjusting the TRVs.

Room thermostats need a free flow of air to sense the temperature, so they must not be covered by curtains or blocked by furniture. Nearby electric fires, televisions, wall or table lamps may prevent the thermostat from working properly.

Thermostat is compatibile with OpenTherm OT+ 4.0 version.
The OpenTherm protocol is an open standard communication protocol used in central heating systems for two-way communication between a central heating boiler and a room thermostat. Thanks to the communication protocol, the boiler power is modulated, which can significantly increase the energy efficiency of the heating system while maintaining the set temperature in the room. OpenTherm modulation, compared to standard communication (ON / OFF), occurs by setting the desired temperature of water from the boiler (boiler power), and not by its cyclical switching on and off.

⚠️ **PLEASE NOTE!**

Make sure your gas combi boiler is compatible with OT + 4.0 communication protocol.
The list of compatible boilers is on the next page.

Product advantages:

• automatically detects OT + 4.0 protocol and regulates hot water temperature

• possibility to choose Hysteresis or built-in TPI algorithm for all types of heating

• works with time schedules

• service mode protected by a PIN code

• maximum / minimum temperature limitation

• can temporarily change the temperature (overwriting until the next program change)

2.1 Example of boilers compatible with the OpenTherm OT+ 4.0 protocol

COMPANY	MODEL

2.2 Montage

2.3 Package content

1) RT520 thermostat
2) Back housing
3) 2x AA batteries
4) Short instruction
5) Mounting screws

2.4 Proper thermostat location

⚠ **Please note:**
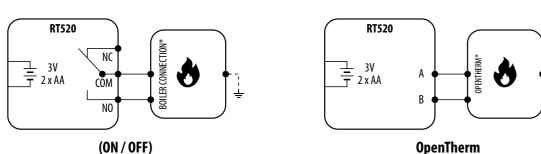

The ideal position to thermostat mounting is about 1,5m under floor level far from heating or cooling sources. Thermostat can't be exposed to sunlight or any extreme conditions like for example draft.

Because of fire and explosion risk there is not allowed to use thermostat in atmosphere of explosive gases and flammable liquids (eg coal dust). In case if any of listed dangers occur you have to use additional protection measures – anti-dust and explosive gases (tight cover) or prevent their formation. Furthermore, thermostat can't be used in condensation of water vapor conditions and be exposed to water action.
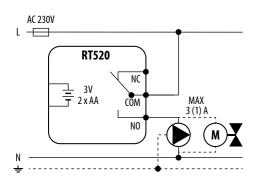

2.5 Connection description
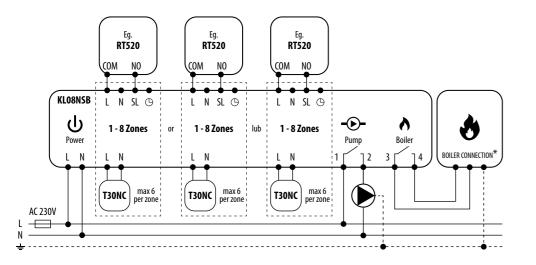

I A - Boiler connection

(ON / OFF)

OpenTherm
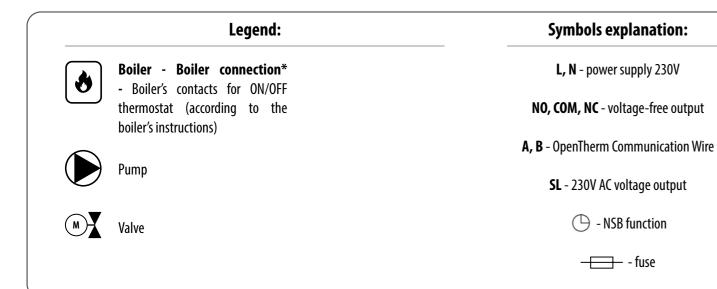

I B - Pump / Valve connection

I C - KL08NSB underfloor heating wiring center connection

Legend:		Symbols explanation:
	Boiler - Boiler connection* **-** Boiler's contacts for ON/OFF thermostat (according to the boiler's instructions)	**L, N** - power supply 230V
	Pump	**NO, COM, NC** - voltage-free output
		A, B - OpenTherm Communication Wire
	Valve	**SL** - 230V AC voltage output
		⏲ - NSB function
		▭ - fuse

3. Before you start (first power up)

3.2 Button description

1. MENU / RETURN - enter the menu options, press and hold for 3 sec to return to main screen or to deactivate Boost or Manual modes.
2. SELECT - confirm changes and enter menus.
3. DOWN - decrease the temperature and move through the menus.
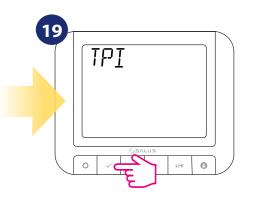

4. UP - increase the temperature and move through menus.
5. BOOST - activate Boost Mode.
6. MANUAL - press once to activate / press and hold for 3 sec to deactivate Manual Mode.

⚠ **PLEASE NOTE!** The LCD screen can be activated by using any button.

3.3 First power up sequence and configuration

ⓘ Please make the receiver connections and power the receiver before inserting the batteries into the thermostat.

1
After inserting the batteries, the thermostat will power up.

2
Press [✓].

3
Using [˄] or [˅], choose your language and then press [✓].

4
Using [˄] or [˅], choose the time format.

5
Press [✓] to confirm.

6
Using [˄] or [˅], set the hour and then press [✓].

7
Using [˄] or [˅], set the minutes and then press [✓].

8
Using [˄] or [˅], set the year and then press [✓].

9
Using [˄] or [˅], set the month and then press [✓].

10
Using [˄] or [˅], set the day and then press [✓].

11
Using [˄] or [˅], select the week format.

12
Press [✓] to confirm.

13
Using [˄] or [˅], enable or disable DST (Daylight Saving Time).

14
Press [✓] to confirm.

15
Press [✓].

16
Using [˄] or [˅], select your temperature accuracy.

17
Press [✓] to confirm.

18
When OpenTherm is connected, the device software will automatically adjust to the OpenTherm settings.

19

`TPI`

Press ☑.

TPI (Time Proportional & Integral) is a self-learning, time-proportional algorithm. TPI type of regulation ensures economical system operation through more accurate temperature maintenance during controlling process and limits overload conditions. In addition to the exact and stable room temperature, the advantage of this system is the minimization of energy consumption and significant savings. RT520 offers 3 types of TPI control: 1. for radiator (6CPH); 2. for underfloor heating (3CPH); 3. for electric heating (9CPH).

20

`TPI RAD`

`TPI UFH`

21

`TPI ELEC`

Using ∧ or ∨, select the TPI type you want to use.

Press ☑ to confirm.

22

`SPAN`

Press ☑.
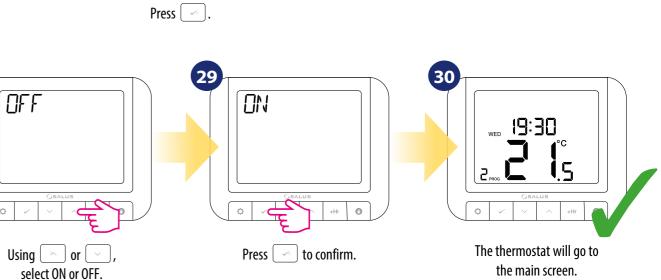

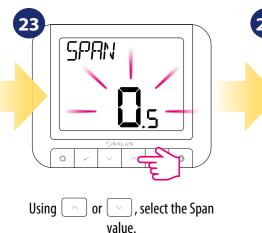

Span is the difference between the measured temperature and the set temperature.

23

`SPAN`
`0.5`

24

`SPAN`
`0.2 s`

Using ∧ or ∨, select the Span value.
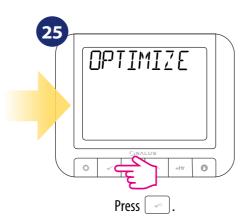

Press ☑ to confirm.

25

`OPTIMIZE`

Press ☑.

The optimization function is an energy-saving algorithm used for efficient control of the heating device, ensuring better thermal comfort at certain times of the day. When the OPTIMUM START function is active, the thermostat sends a heating signal to the heat source beforehand so that the preset temperature in the room is reached at the time specified in the schedule.

25

`OPTIMUM`

`START`

26

`ON`

Press ☑.

Using ∧ or ∨, select ON or OFF.
Press ☑ to confirm.

27

`OPTIMUM`

`STOP`

Press ☑.
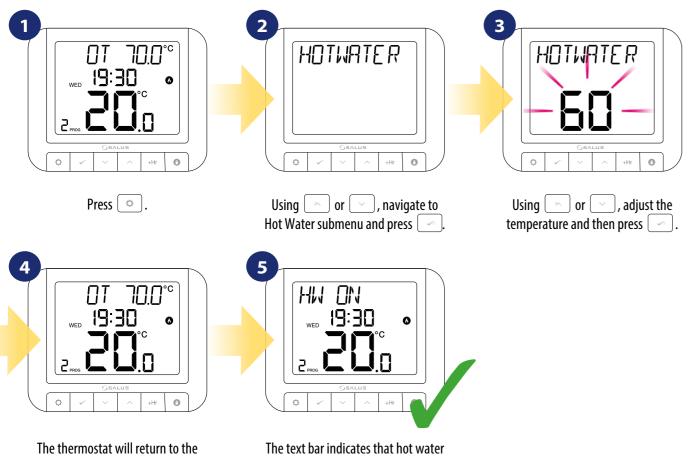

When the OPTIMUM STOP function is active, the thermostat, taking into account the inertia of the system, switches off the heat source earlier, keeping the temperature set in the schedule.

28

`OFF`

29

`ON`

30

`WED 19:30`
`2 PROG 21.5 °C`

Using ∧ or ∨, select ON or OFF.

Press ☑ to confirm.

The thermostat will go to the main screen.

3.4 OpenTherm - Hot Water configuration

RT520 can be configured in Hot Water OPENTHERM system. To configure it follow steps below:

1

OT 70.0°C
WED 19:30 Ⓐ
2 PROG **20.0**°C

Press ⚙ .

2

HOTWATER

Using ⌃ or ⌄ , navigate to
Hot Water submenu and press ✓ .

3

HOTWATER
60

Using ⌃ or ⌄ , adjust the
temperature and then press ✓ .

4

OT 70.0°C
WED 19:30 Ⓐ
2 PROG **20.0**°C

The thermostat will return to the
main screen. Press any button.

5

HW ON
WED 19:30 Ⓐ
2 PROG **20.0**°C ✔

The text bar indicates that hot water
is in operation.

4. User settings
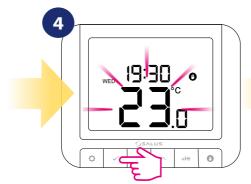

4.1 Manual mode

In manual mode, the thermostat maintains a constant temperature set by the user. To exit mode, press and hold ⦿ button for 3 seconds. A hand icon is displayed when manual mode is active.

1

WED 19:30
2 PROG **21.5**°C

Press ⦿ button.

2

WED 19:30 ✋
21.5°C

A hand icon will appear, which means
that thermostat is in manual mode.

3

WED 19:30 Ⓐ
21.5°C

To set temperature use
⌃ or ⌄ button.

4

WED 19:30 ✋
23.0°C
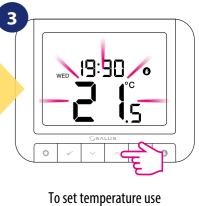

Confirm your choice using
✓ button.

5

WED 19:30 ✋Ⓐ
21.5°C ✔

Thermostat will maintain the
temperature until manual change or
manual mode exit (press and hold
⦿ button for 3 seconds).
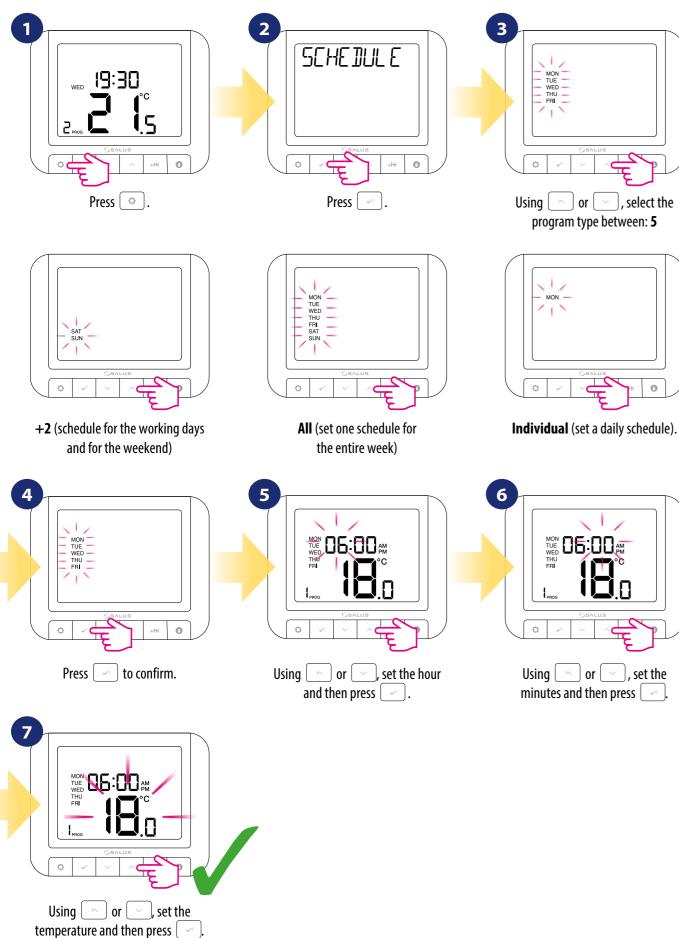

4.2 Schedule mode - programming schedule
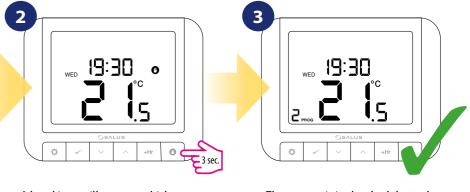

In this mode, user can set the schedules for thermostat (temperature setpoints for specific periods of time). Programmed schedules should use all time periods.

1

Press ⚙.

2

Press ✓.

3

Using ∧ or ∨, select the program type between: **5**

+2 (schedule for the working days and for the weekend)

All (set one schedule for the entire week)

Individual (set a daily schedule).

4

Press ✓ to confirm.

5

Using ∧ or ∨, set the hour and then press ✓.

6

Using ∧ or ∨, set the minutes and then press ✓.

7

Using ∧ or ∨, set the temperature and then press ✓.

ⓘ Repeat the process for all time periods.

4.3 Switching between manual and schedule mode

In this option, user can switch between manual and schedule mode by using 🔘 button. To do that please follow steps below:

1

Press 🔘 button.

2

A hand icon will appear, which means that thermostat is in manual mode. Now press and hold 🔘 button.

3 sec.

3
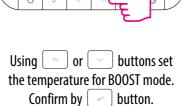

Thermostat is in the shedule mode again.

4.4 BOOST mode - hourly temperature override (+Hr)

The function is available in automatic and manual mode. Used to change the temperature to the desired value for a specified number of hours (up to 9 hours). After the elapsed time, the thermostat returns to the previous operating mode.

1

2

3

Press +Hr button to set hour for temporary override (eg. 4 hours = 4 times button pressing). Confirm by ☑ button.

Using ⌃ or ⌄ buttons set the temperature for BOOST mode. Confirm by ☑ button.
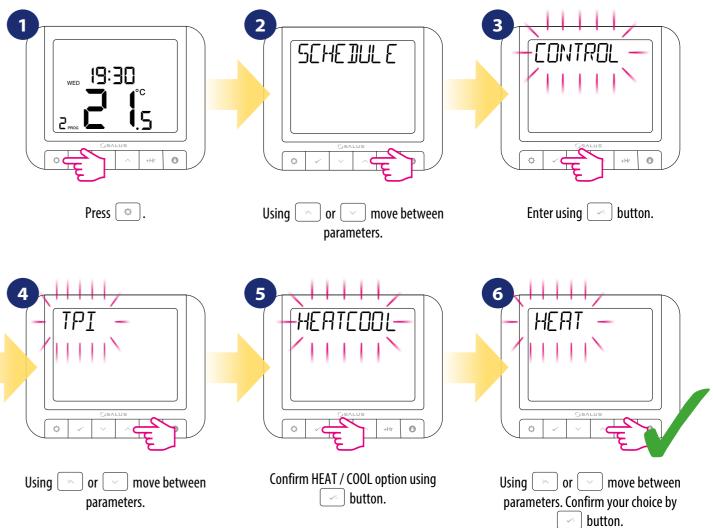

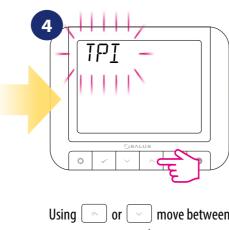

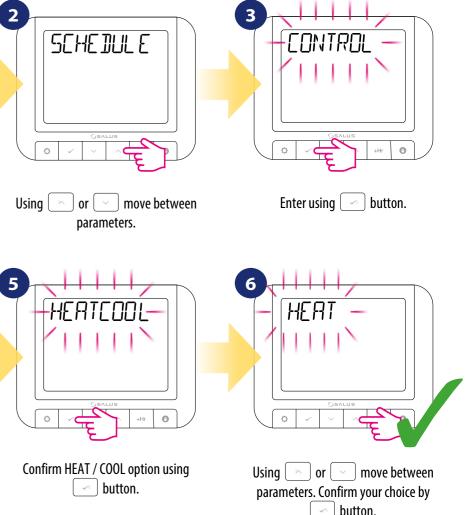

Thermostat is working in BOOST mode for 4 hours and it will maintain temperature setpoint for 4 hours.

How to stop BOOST mode:

1

2

Hold ⚙ button for 3 seconds or press +Hr button several times until "+0" will appear and confirm by ☑ button.
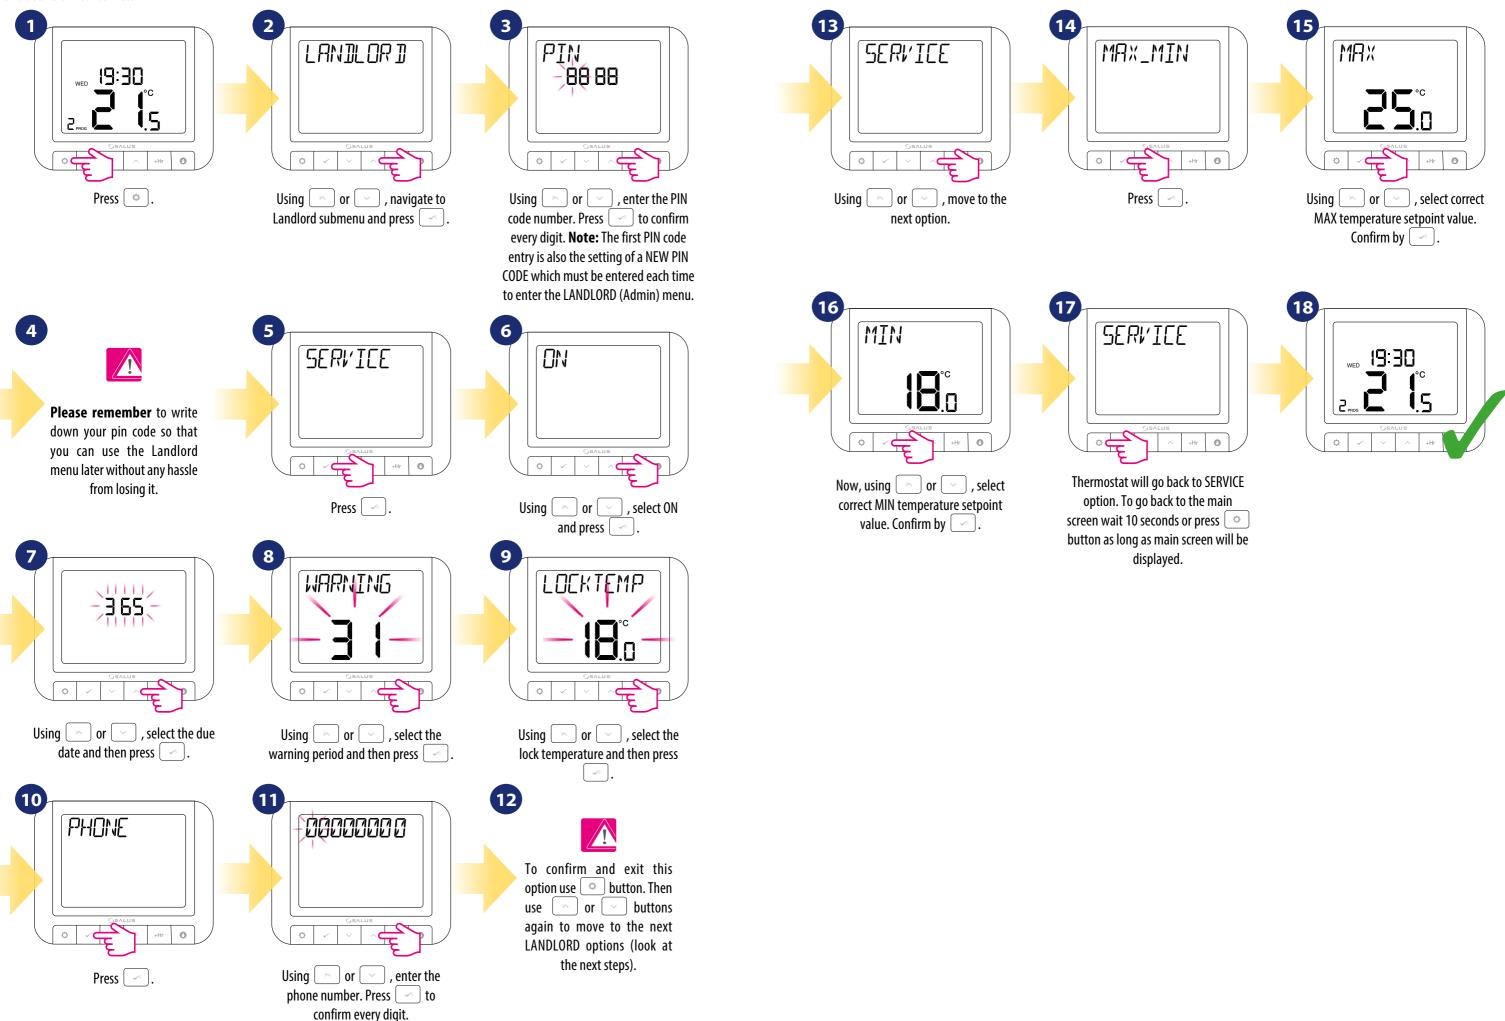

Thermostat will go back to main screen and previous work mode.

4.5 Control and Heat/Cool settings

In this option user can set control algorithm (TPI, SPAN or Optimize) and set Heat / Cool mode. Please follow the steps below:

1

2

3

Press ⚙ .

Using ⌃ or ⌄ move between parameters.

Enter using ☑ button.

4

5

6

Using ⌃ or ⌄ move between parameters.

Confirm HEAT / COOL option using ☑ button.

Using ⌃ or ⌄ move between parameters. Confirm your choice by ☑ button.

4.6 Landlord settings

Landlord settings is a pin code protected feature that allows the landlord to set a service reminder on the thermostat that will warn the tenant when the boiler is due its annual service.

1

Press ⚙.

2

Using ⌃ or ⌄ , navigate to Landlord submenu and press ✓ .

3

Using ⌃ or ⌄ , enter the PIN code number. Press ✓ to confirm every digit. **Note:** The first PIN code entry is also the setting of a NEW PIN CODE which must be entered each time to enter the LANDLORD (Admin) menu.

4

⚠

Please remember to write down your pin code so that you can use the Landlord menu later without any hassle from losing it.

5

Press ✓ .

6

Using ⌃ or ⌄ , select ON and press ✓ .

7

Using ⌃ or ⌄ , select the due date and then press ✓ .

8

Using ⌃ or ⌄ , select the warning period and then press ✓ .

9

Using ⌃ or ⌄ , select the lock temperature and then press ✓ .

10

Press ✓ .

11

Using ⌃ or ⌄ , enter the phone number. Press ✓ to confirm every digit.

12

⚠

To confirm and exit this option use ⚙ button. Then use ⌃ or ⌄ buttons again to move to the next LANDLORD options (look at the next steps).

13

Using ⌃ or ⌄ , move to the next option.

14

Press ✓ .

15

Using ⌃ or ⌄ , select correct MAX temperature setpoint value. Confirm by ✓ .

16

Now, using ⌃ or ⌄ , select correct MIN temperature setpoint value. Confirm by ✓ .

17

Thermostat will go back to SERVICE option. To go back to the main screen wait 10 seconds or press ⚙ button as long as main screen will be displayed.

18

4.7 Time/Date

To set time/date follow steps below:

1

Press ⚙ .

2
SCHEDULE

Using ∧ or ∨ move between parameters.

3
TIMEDATE

Press ✓ to enter Time/Date settings.

4
TIME 24 hr

Using ∧ or ∨ , choose the time format. Press ✓ to confirm.

5
TIME 88:88 AM PM

Using ∧ or ∨ , set the hour and then press ✓ .

6
TIME 88:88 AM PM

Using ∧ or ∨ , set the minutes and then press ✓ .

7
YEAR 18

Using ∧ or ∨ , set the year and then press ✓ .

8
MONTH 01

Using ∧ or ∨ , set the month and then press ✓ .

9
DAY 01

Using ∧ or ∨ , set the day and then press ✓ .

10
DISPLAY
MON TUE WED THU FRI SAT SUN

Using ∧ or ∨ , select the week format. Press ✓ to confirm.

11
DST_ON

Using ∧ or ∨ , enable or disable DST (Daylight Saving Time). Press ✓ to confirm.

12
WED 19:30 21.5 °C

Thermostat will go to the main screen with saving all the settings.

4.8 Holiday mode
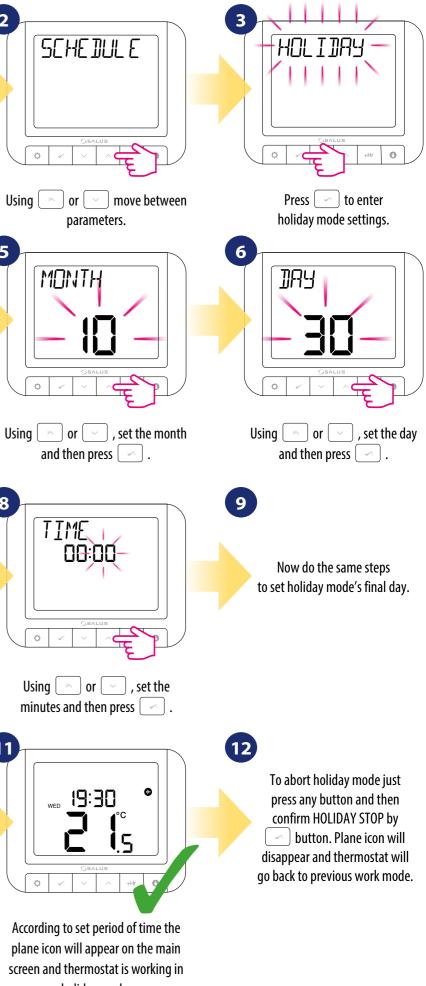

Holiday mode is a special program temperature setpoint which thermostat will maintain for specified days. How to set **HOLIDAY MODE:**
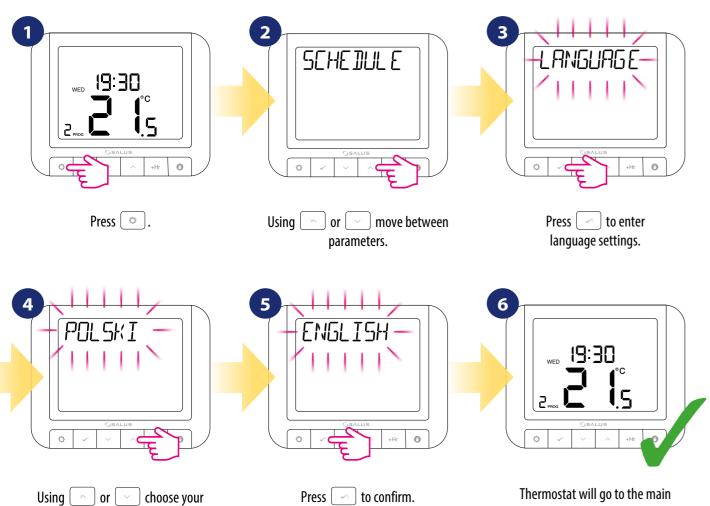

1
WED 19:30 21.5 °C

Press ⚙ .

2
SCHEDULE

Using ∧ or ∨ move between parameters.

3
HOLIDAY

Press ✓ to enter holiday mode settings.

4
YEAR 20

Using ∧ or ∨ , set the year and then press ✓ .

5
MONTH 10

Using ∧ or ∨ , set the month and then press ✓ .

6
DAY 30

Using ∧ or ∨ , set the day and then press ✓ .

7
TIME 00:00

Using ∧ or ∨ , set the hour and then press ✓ .

8
TIME 00:00

Using ∧ or ∨ , set the minutes and then press ✓ .

9
Now do the same steps to set holiday mode's final day.

10
FROST 5.0 °C

Using ∧ or ∨ , set the temperature which should be maintaned during holiday mode and then press ✓ .

11
WED 19:30 21.5 °C

According to set period of time the plane icon will appear on the main screen and thermostat is working in holiday mode.

12
To abort holiday mode just press any button and then confirm HOLIDAY STOP by ✓ button. Plane icon will disappear and thermostat will go back to previous work mode.

4.9 Language

To choose language follow steps below:

1 Press ⚙.

2 Using ∧ or ∨ move between parameters.

3 Press ✓ to enter language settings.

4 Using ∧ or ∨ choose your language.

5 Press ✓ to confirm.

6 Thermostat will go to the main screen with saving the changes.

5. Factory Reset

To RESET RT520 thermostat to it's factory default settings please follow steps below:

1 To reset the thermostat press and hold together ⚙ + ∨ + +Hr buttons for 5 seconds.

**2** Thermostat has been reseted. **PLEASE NOTE:** User settings will not be deleted.

6. Error codes

⚠ Thermostat will display errors only when it's connected to the boiler by OPENTHERM terminals (A / B). Please refer then to boiler manual. Each boiler can have different error codes.

7. Battery change

Turn the thermostat over so that the back is in front of you. Now look at the picture below:

INSERT THE BATTERIES, PAYING ATTENTION TO THEIR POLARITY!

8. Cleaning and Maintenance

The **RT520 thermostat** requires no special maintenance. Periodically, the outer casing can be wiped clean using a dry cloth (please DO NOT use solvents, polishes, detergents or abrasive cleaners, as these can damage the thermostat). There are no user serviceable parts within the unit; any servicing or repairs could only be carried out by **Salus Controls** or their appointed agents.
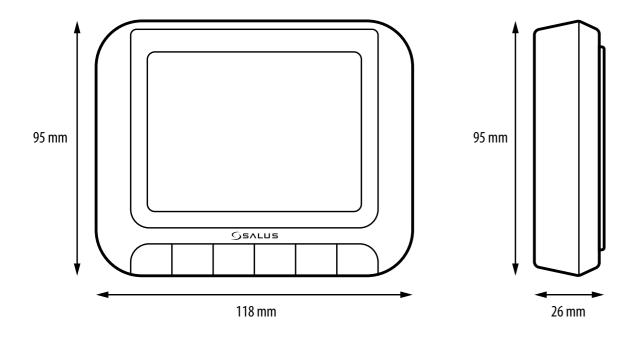

9. Technical Informations
