Efficient, Safe, and Smart Charging for Your Home

High-Power Charging:

7kW model for fast, reliable charging that fits your vehicle's needs.

5-Meter Type 2 Charging Cable:

Includes a versatile 5-meter Type 2 charging cable, providing flexibility and convenience for various charging locations.

Smart Control via App:

Manage your charger from anywhere with the SALUS app. Schedule off-peak charging, monitor your usage, and track your charging history with ease.

NFC Access Management:

Ensure that only authorized users can start a charging session, adding an extra layer of security.

PEN Fault Protection:

The UK model includes built-in PEN fault detection, eliminating the need for additional grounding equipment and ensuring compliance with UK regulations.

Durable and Weather-Resistant:

Designed for both indoor and outdoor use, with an IP54 ingress protection rating and IK08 impact protection.

Easy Installation:

Comes with a Y-shape metallic wall mount for simple, secure installation in any environment.

Why Choose SALUS?

Smart Charging:

Stay in control with advanced features accessible through your smartphone.

Safety First:

Our chargers meet the highest safety standards, including compliance with the latest regulations.

Reliable Performance:

Enjoy fast, efficient charging with robust protection against power surges, temperature fluctuations, and more.
