

The IT700 Smart Thermostat

Enhance your home with the IT700, a modern solution for smart temperature control. Designed to offer convenience, efficiency, and connectivity, the IT700 thermostat combines advanced technology with a sleek design, making it a versatile option for any home.

Key Features:

Ultra-Thin Design: The thinnest thermostat on the market at just 11mm, seamlessly blending into your home decor.

WiFi Connectivity: Stay connected to your home's temperature from anywhere with our reliable WiFi connection.

Zigbee Communication: Ensure local control even without an internet connection, offering unmatched reliability.

Pre-Paired for Easy Installation: Ready to use straight out of the box, making setup a breeze.

Smart Home Integration: Control your thermostat and more with the intuitive Smart Premium Lite app, compatible with Amazon Alexa and Google Home.

Rechargeable Battery: A green solution with a micro USB rechargeable battery, reducing the need for frequent replacements.

Versatile Control: Perfect for heating and cooling installations, giving you the flexibility to manage your home's climate with ease.

Home Heating and Cooling:

Perfect for underfloor systems, heat pumps, and more, with compatibility for additional smart relays and plugs for extended control.

Electrical Systems:

Manage multiple electric radiators with ease, making the IT700 ideal for single-zone internet-connected systems.

Why Choose IT700?

Enhanced Performance: The IT700 provides upgraded features and a smoother user experience.

No Gateway Required: With a built-in WiFi receiver, the IT700 eliminates the need for an additional gateway or Ethernet connection.

Easy-to-Use Interface: The large LCD display and straightforward controls make managing your settings effortless.

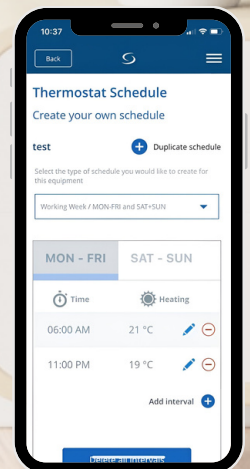

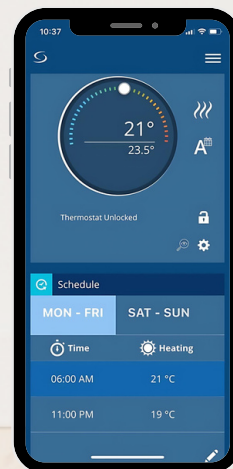

Secure and Versatile: Perfect for Airbnb rentals and similar uses, with lock/unlock capabilities, admin pin codes, and adaptable installation options.

Seamless Integration: The IT700 connects effortlessly with the WZ600WE WiFi Zigbee receiver to control your boiler or heat pump. It integrates with the SALUS Smart Home ecosystem, pairing with devices like SR600 relays and SP600 plugs for comprehensive control over your heating and connected appliances.

Smart Home Integration:

Control your IT700 thermostat via the SALUS Premium Lite App, offering features such as:

- Auto, Manual, and Boost Modes
- Schedule and Geolocation-Based Adjustments
- Push Notifications for Status Updates
- Advanced Locking Features for Added Security

Choose the IT700 Smart Thermostat today!

Whether you're upgrading your existing system or installing a new one, the IT700 offers the perfect blend of modern design, advanced technology, and user-friendly functionality.
