

# EL600F ELYPSO

REDEFINING COMFORT IN THE SMART HOME ERA

The **EL600F Elypso** connects seamlessly with other devices in the SALUS ecosystem, transforming your home into a fully automated, efficient, and comfortable space.

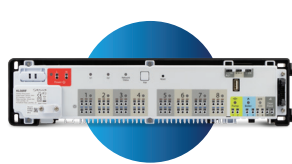

### Flexible ZigBee Connectivity

Works in both ONLINE mode (remote control via the SALUS Premium Lite mobile app) and OFFLINE mode (local control for products that use ZigBee 3.0 protocol devices), ensuring full integration with your smart home setup.

### Effortless Integration with Multiple Devices

Works with a wide range of SALUS products, including:

Underfloor Heating  
Wiring Center

Smart Thermostatic  
Radiator Valves

Smart Plugs and  
Relays

Boiler Control  
Modules

### Top Benefits for Your Smart Home

#### Smart Automation for Custom Comfort

- Create tailored scenarios with the SALUS Premium Lite app, like "Holiday Mode" or "Frost Protection," so your home adjusts to your lifestyle.

#### Enhanced Safety and Energy Savings

- Smart modes help lower energy costs while protecting your home.

#### Remote Access Anytime, Anywhere

- Adjust and monitor temperature from anywhere with your phone—whether you're at work or on vacation.

#### Sleek Design and Easy Setup

- Flexible mounting options and an intuitive interface make it easy to integrate into any home.

### How the EL600F Makes Life Easier

#### Centralized Control for All Your Devices

Manage all your SALUS devices in one app for quick and easy adjustments.

#### Clear, Simple Monitoring

The display shows connection, battery life, and temperature keeping you informed at a glance.

#### Built for Smart Homes

From TRV control to advanced automations, the EL600F elevates smart home comfort.
