

MS610

Smart Motion Sensor

About this product...

The SALUS MS610 Smart Motion Sensor is designed for indoor use only to provide 24/7 protection for your home by sending instant alert notifications to your mobile phone whenever motion is detected. With a 90° field of view and up to a 10m detection range, it adapts seamlessly to a variety of indoor environments. This sensor is particularly useful for business owners, as it can be linked with a doorbell to alert when people enter or leave a premises, making it ideal for monitoring visitors through the front or back door. Its battery-operated design eliminates the hassle of wires, ensuring a sleek and tidy installation on any wall. The sensor's easy, tool-free installation with 3M adhesive saves time and effort, allowing you to place it anywhere in your home.

Works with:
SALUS Premium Lite

Create a secure safe space...

The SALUS MS610 Smart Motion Sensor is an advanced security device designed to enhance the safety of your property by detecting movement and sending instant alerts. By strategically placing these sensors around your home or property, you can create a comprehensive and customizable safety perimeter. Whether installed near entry points, hallways, or in areas with high foot traffic, the sensors will help you monitor for unusual activity, ensuring that you're always aware of potential threats. With its intelligent design and seamless integration with other smart home systems, the MS610 offers you peace of mind, making it easier to build a "safe space" that adapts to your unique needs. Whether you're at home or away, the SALUS MS610 keeps you connected to your security system, providing real-time updates to help you feel secure.

Control via the App...
