

RT520

Boiler Plus Compliant Thermostat

The RT520 is the latest addition to SALUS' tried and tested RT range of thermostat heating controls. With a new on-board load compensation feature, it offers the most cost effective fully compliant Boiler Plus solution on the market providing the homeowner with optimum efficiency and maximum heating control comfort.

The wired RT520 thermostat includes all the features of the previous RT series with a larger more intuitive LCD display and a handy new suite of additional operational and efficiency functions.

Characteristics

- Simple, quick and straightforward operation and setup
- ErP Rating V
- PIN entry option
- 5 year warranty
