

Advanced security

We are preparing a comprehensive lineup of security products integrated with SALUS Smart Home systems.

These solutions enhance home security, ensuring peace of mind and robust property protection.

Net zero home

The **EV7UK EV Charger** offers efficient, high-power charging, featuring the market's thinnest form factor for minimal obtrusion in garages and driveways.

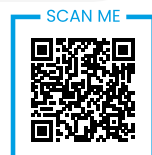

- Designed for residential use.
- The socket-type EV Charger supports 7kW charging power.
- Connects to smartphone or WiFi network.
- Uses Open Charge Point Protocol (OCPP) for smart charging.
- The thinnest form factor on the market.

The Hybrid Solar System features hybrid inverters and backup batteries, integrating seamlessly with SALUS Smart Home for comprehensive energy management.

- Hybrid solar Inverter compatible with Lithium Polymer batteries.
- Two models: 8kW single-phase and 10kW three-phase inverters.
- Feeds grid, home electrical needs, and charges batteries.
- Low voltage batteries for single phase and high voltage batteries for three-phase.

CONTROLS

NEW ARRIVALS

IT800WIFI

Smart thermostat

- Modern design with a metallic ring and negative display.
- Rechargeable Li-ion battery with wireless recharging.
- WiFi setup via Bluetooth.
- Controls heating and cooling via app or locally.
- Energy optimisation features.
- Compatible with SR600 and SPE600.
- Zigbee 2.4 GHz communication.

Optimised control

UG800

The **UG800 Universal Gateway** is a robust Zigbee gateway that connects up to 200 devices, offering seamless integration with cloud services and smart home systems.

- Connects multiple Zigbee wireless devices in a smart home system.
- Controls room thermostats, radiator valve controllers, smart plugs, switches, and sensors.
- Fully compliant with Zigbee 3.0.
- Supports up to 200 end devices.
- Cloud integration via AWS.
- Offers WiFi and Ethernet connectivity with BLE for easy setup.

TRV3RF

The **TRV3RF Super Quiet TRV** offers quiet operation, advanced features and Zigbee 3.0 connectivity, ideal for efficient home heating management.

- Super low noise design.
- Operates standalone or pairs with a room thermostat.
- Intuitive interface with a dial knob and LCD display.
- Supports 4 display orientations for flexible radiator installations.
- Quick-connect mounting for easy valve installation.
- Interchangeable adapters (M30, M28, RA).
- Zigbee 3.0 for reliable wireless connectivity.

EL600F

The **EL600F Elypso Smart Thermostat** offers a seamless blend of intuitive user experience and modern design, ensuring effortless integration into any contemporary space.

- Works with UG600/UG800 gateways and RX30RF Smart Receiver, as part of the Smart Home System.
- Compatible with various Smart Home devices.
- Equipped with a rechargeable battery.
- Highly versatile and easy to install.
- Supports Zigbee 3.0, 2.4 GHz connectivity.
- Easy placement options: wall, flat surface, charging dock.

SQ610BRF

The **SQ610BRF Smart Thermostat** is a versatile and advanced solution for modern temperature control, designed for contemporary homes.

- Wireless thermostat with a built-in humidity sensor.
- Battery-powered for easy installation and flexibility.
- Suitable for UFH and boiler control.
- Digital programmable thermostat with three programming modes.
- Slim design with a 9mm profile, after installation.

SIR600

The **SIR600** is a **smart IR AC controller** that integrates with the SALUS Smart Home System, offering WiFi and Bluetooth connectivity and compatibility with numerous AC brands.

- Integrates seamlessly with the SALUS Smart Home System.
- Controls AC units via the Smart Premium App.
- Compatible with hundreds of AC brands using infrared remote control.
- Status-Sync feature updates the SALUS system when the original remote control is used.
- Connectivity options include WiFi 2.4GHz and Bluetooth.
